The author-title-comp style

This style is a compact version of the author-title style which prints the author only once if subsequent references passed to a single citation command share the same author. This style will implicitly enable the sortcites package option at load time.

Additional package options

The dashed option

By default, this style replaces recurrent authors/editors in the bibliography by a dash so that items by the same author or editor are visually grouped. This feature is controlled by the package option dashed. Setting dashed=false in the preamble will disable this feature. The default setting is dashed=true.

Multiple citations

Aristotle, Physics, Poetics, Rhetoric, Averroes, Possibility of Conjunction.
