The author-title-icomp style

This style combines the features of author-title-ibid and author-title-comp. It will implicitly enable the sortcites package option at load time. This style is intended for citations given in footnotes.

Additional package options

The ibidpage option

The scholarly abbreviation ibidem is sometimes taken to mean both ‘same author + same title’ and ‘same author + same title + same page’ in traditional citation schemes. By default, this is not the case with this style because it may lead to ambiguous citations. If you prefer the wider interpretation of ibidem, set the package option ibidpage=true or simply ibidpage in the preamble. The default setting is ibidpage=false.

The dashed option

By default, this style replaces recurrent authors/editors in the bibliography by a dash so that items by the same author or editor are visually grouped. This feature is controlled by the package option dashed. Setting dashed=false in the preamble will disable this feature. The default setting is dashed=true.

Hints

If you want terms such as ibidem to be printed in italics, redefine \mkibid as follows:

\renewcommand*{\mkibid}{\emph}

\footcite examples
