The **authortitle-ticomp** style

This style essentially combines **authortitle-terse** and **authortitle-icomp**. It will implicitly enable the `sortcites` package option at load time.

**Additional package options**

**The ibidpage option**

The scholarly abbreviation *ibidem* is sometimes taken to mean both ‘same author + same title’ and ‘same author + same title + same page’ in traditional citation schemes. By default, this is not the case with this style because it may lead to ambiguous citations. If you prefer the wider interpretation of *ibidem*, set the package option `ibidpage=true` or simply `ibidpage` in the preamble. The default setting is `ibidpage=false`.

**The dashed option**

By default, this style replaces recurrent authors/editors in the bibliography by a dash so that items by the same author or editor are visually grouped. This feature is controlled by the package option `dashed`. Setting `dashed=false` in the preamble will disable this feature. The default setting is `dashed=true`.

\`\cite` examples

Averroes
Aristotle. *Physics*
Aristotle. *Rhetoric*
ibid.

Multiple citations

Aristotle. *Physics|Poetics|Rhetoric|Averroes*
