The **authortitle-ticomp** style

This style essentially combines **authortitle-terse** and **authortitle-icomp**. It will implicitly enable the **sortcites** package option at load time.

**Additional package options**

The **ibidpage** option

The scholarly abbreviation *ibidem* is sometimes taken to mean both ‘same author + same title’ and ‘same author + same title + same page’ in traditional citation schemes. By default, this is not the case with this style because it may lead to ambiguous citations. If you you prefer the wider interpretation of *ibidem*, set the package option **ibidpage=true** or simply **ibidpage** in the preamble. The default setting is **ibidpage=false**.

The **dashed** option

By default, this style replaces recurrent authors/editors in the bibliography by a dash so that items by the same author or editor are visually grouped. This feature is controlled by the package option **dashed**. Setting **dashed=false** in the preamble will disable this feature. The default setting is **dashed=true**.

\cite examples

\begin{itemize}
\item Averroes
\item Aristotle, *Physics*
\item Aristotle, *Rhetoric*
\item ibid.
\end{itemize}
