The verbose-ibid style

This citation style is a slightly more compact variant of the verbose style. Immediately repeated citations are replaced by the abbreviation ‘ibidem’ unless the citation is the first one on the current page or double page spread (depending on the setting of the pagetracker package option). This style is also intended for citations given in footnotes.

Additional package options

The ibidpage option

The scholarly abbreviation ibidem is sometimes taken to mean both ‘same author + same title’ and ‘same author + same title + same page’ in traditional citation schemes. By default, this is not the case with this style because it may lead to ambiguous citations. If you you prefer the wider interpretation of ibidem, set the package option ibidpage=true or simply ibidpage in the preamble. The default setting is ibidpage=false.

The citepages option

Use this option to fine-tune the formatting of the pages and pagetotal fields in verbose citations. When an entry with a pages field is cited for the first time and the postnote is a page number or a page range, the citation will end with two page specifications:

In this example, “125” is the postnote and “100–150” is the pages field (there are similar issues with the pagetotal field). This may be confusing to the reader. The citepages option controls how to deal with these fields in this case. The option works as follows, given these citations as an example:

\cite{key}
\cite[a note]{key}
\cite[125]{key}

citepages=permit allows duplicates, i.e., the style will print both the pages/pagetotal and the postnote. This is the default setting:

citepages=suppress unconditionally suppresses the pages/pagetotal fields in citations, regardless of the postnote:

citepages=omit suppresses the pages/pagetotal in the third case only. They are still printed if there is no postnote or if the postnote is not a number or range:

citepages=separate separates the pages/pagetotal from the postnote in the third case:

The string “especially” in the third case is the bibliography string thiscite, which may be redefined.

The dashed option

By default, this style replaces recurrent authors/editors in the bibliography by a dash so that items by the same author or editor are visually grouped. This feature is controlled by the package option dashed. Setting dashed=false in the preamble will disable this feature. The default setting is dashed=true.

Hints

If you want terms such as ibidem to be printed in italics, redefine \mkibid as follows:

\renewcommand*{\mkibid}{\emph}
